VACUUM TEST FIXTURES

FLAPPER BOXES

For Leak Testing Applications

The "Flapper Box" is a test fixture specifically designed for high production testing of helium bombed parts with Simple placement and removal of parts. Lid automatically opens when vented. Easily removable stainless screen prevents parts from dropping into port and screens out dirt.

Standard Cavities

	I. D.	Depth
(A) Box	2.375 in.	.75 in.
(B) Box	4.375 in.	1.50 in.
